TYROL – A REGION OF EXCELLENCE IN LIFE SCIENCES

Successful companies and universities ensure a high research output, provide more than 11,000 jobs and deliver an industry turnover of almost 3 billion euros. The Lebensraum Tirol Holding's „**Life Sciences Location Tyrol**“ programme aims to continue this development and position Tyrol as a top European life sciences region by 2030.

Our Health Hub Tirol creates space for innovation and accelerates the dynamism of start-ups.

We support pioneering projects, provide advice and counselling and establish contact with investors.

We strengthen the production location and improve the framework conditions for industry.

We promote industrial research and campaign to attract workers in key occupations. This is done in close cooperation with the Cluster Life Sciences Tirol, the Enterprise Europe Network and the Business Relocation & Location Development of the Standortagentur Tirol.
